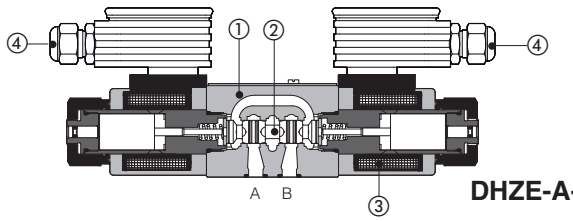
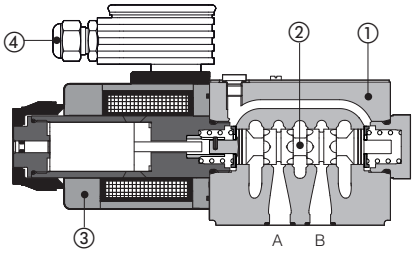
Proportional directional valves type DHZE-A and DKZE-A

direct operated, without position transducer, ISO 4401 size 06 and 10



DHZE-A-07*



DKZE-A-15*

① Valve body
② Spool
③ Proportional solenoid
④ Digital electronic driver E-MI-AS-IR (to be ordered separately)

DHZE-A and DKZE-A are open-loop direct operated proportional valves with threaded type proportional solenoids, certified according to North American standard **cURus**.
They operate in association with electronic drivers, see section 2, which supply the proportional valves with proper current to align the valve regulation to the reference signal supplied to the electronic driver.
The spools are available with linear L, progressive S or differential D flow characteristics.
The valve body is 3 chambers type for DHZE and 5 chambers type for DKZE.
The solenoid coils are plastic encapsulated with insulation class H and they are available with different nominal resistances depending to the voltage supply (12 VDC or 24 VDC) and to the electronic driver type, see section 2 and 4.

Mounting surface:
ISO 4401 sizes 06 and 10.

Max flow with valve differential pressure p = 30 bar, see section 3
50 l/min for DHZE - 105 l/min for DKZE
Max pressure = 350 bar for DHZE
315 bar for DKZE

Notes:
- Above performance data refer to valves coupled with Atos electronic drivers, see section 2.
- The flow regulated by the directional proportional valves is not pressure compensated, thus it is affected by the load variations.To keep costant the regulated flow under different load conditions, modular pressure compensators are available (see tab. D150).

(1) **Option /B** Solenoid at side of port A, only for valve configuration 5.

(2) **L** = linear flow characteristics
S = progressive flow characteristcs
D = progressive flow characteristics with differential ratio P-A=Q; P-B = Q/2

(3) For different Δp, the max flow is in accordance to the diagrams in sections 7.2 and 8.2

3.1 Auxiliary hand lever

This option is available only for DHZE-A with spool type **S3, S5, D3, D5, L3, L5**.
It allows to operate the valve in absence of electrical power supply. For detailed description of DHZE-A with hand lever option see table E138

- **Option /MO** horizontal hand lever
- **Option /MV** vertical hand lever
- **Option /BMO** horizontal hand lever installed at side of port A

5 GENERAL NOTES

DHZE and DKZE proportional valves are CE marked according to the applicable Directives (e.g. Immunity/Emission EMC Directive and Low Voltage Directive).

Installation, wirings and start-up procedures must be performed according to the general prescriptions shown in table F003 and in the installation notes supplied with relevant components.

The electrical signals of the valve (e.g. monitor signals) must not be directly used to activate safety functions, like to switch-ON/OFF the machine's safety components, as prescribed by the European standards (Safety requirements of fluid technology systems and components-hydraulics, EN-982).
